

2021 Energy Smart Forum  
**BUILDING CORPORATE CAPACITY FOR ENERGY MANAGEMENT**  
23 November 2021 | 9:30am to 12:00pm via Zoom

**Event Overview**

The future of the energy sector envisions renewable and decentralized energy production that necessitates energy management at the corporate level. In compliance with the requirements and coverage of the Energy Efficiency and Conservation (EEC) Act along with its implementing rules and guidelines, building corporate capacity for energy management is relevant for all businesses.

The ECCP Energy Smart Forum Series 2021, with the theme “Building a Competitive, Sustainable and Resilient Energy Future” will provide an avenue for discussions on the collaborative efforts of energy stakeholders to support business continuity and productivity as well as to access emerging business opportunities in the energy sector.

Join us in the Forum “**Building Corporate Capacity for Energy Management**” as we inquire on the best practices and methodologies for energy management at the corporate level through skills and capacity building. Prepare for business continuity and resiliency through sustainability initiatives and management.
